

<i>Date</i>	<i>Topic</i>	<i>Due</i>	<i>Notes</i>
<i>Wednesday, May 12</i>	Data types, observational studies + experiments		First day of class!
	PS 1 and AE 1 assigned		Start reading Chapter 1 of textbook
<i>Thursday, May 13</i>	Sampling principles, experimental design		
	Lab 1: Intro to R		
<i>Friday, May 14</i>	Data summarization (numerical)	PS 1	Start reading Chapter 2 of textbook
	PS 2 and AE 2.1 assigned		
	-----	-----	-----
<i>Monday, May 17</i>	Data summarization (categorical), randomization test	Lab 1	
	AE 2.2 assigned		
<i>Tuesday, May 18</i>	Fundamentals of probability	PS 2	Start reading Chapter 3 of textbook
	Lab 2: Intro to data		
	PS 3 assigned		
<i>Wednesday, May 19</i>	Conditional probability, Bayes theorem		
	PS 3 and AE 3.1 assigned		
<i>Thursday, May 20</i>	Sampling from small population, random variables	Lab 2	
	Lab 3: Probability		
	AE 3.2 assigned		
<i>Friday, May 21</i>	Normal distribution, Geometric distribution	PS 3	Start reading Chapter 4 of textbook
	PS 4 and AE 4 assigned		
	-----	-----	-----
<i>Monday, May 24</i>	Binomial distribution, Poisson distribution	Lab 3	
	Project released		Start picking data and research questions
<i>Tuesday, May 25</i>	Point estimates, confidence intervals	PS 4	Start reading Chapter 5 of textbook
	Lab 4: Sampling distributions		
	PS 5 assigned		
<i>Wednesday, May 26</i>	Hypothesis testing		
	AE 5 assigned		
<i>Thursday, May 27</i>	Buffer time (for leftover stuff), Mid-term review	Lab 4	
	Lab 5: Confidence intervals		
<i>Friday, May 28</i>	Mid-term day (exam covers Ch. 1-5)		Exam open through 11:59pm Sunday, May 30
	-----	-----	-----
<i>Monday, May 31</i>	Memorial Day holiday, no class!		
<i>Tuesday, June 1</i>	Inference for single proportions	PS 5	Start reading Chapter 6 of textbook
	Lab: discuss Mid-term problems		
	PS 6 assigned		
<i>Wednesday, June 2</i>	Inference for two proportions, chi-square test for GOF	Lab 5	
<i>Thursday, June 3</i>	Chi-square test for GOF & two-way table		
	Lab 6: Inference for categorical data		
	AE 6 assigned		
<i>Friday, June 4</i>	One sample mean t-test, paired data	Project Proposal	Start reading Chapter 7 of textbook
	PS 7 assigned		
	-----	-----	-----
<i>Monday, June 7</i>	Difference of two means, power calculation	PS 6	
<i>Tuesday, June 8</i>	Power calculation (cont.), ANOVA	Lab 6	
	Lab 7: Inference for numerical data		
	AE 7 assigned		
<i>Wednesday, June 9</i>	Basics of linear regression, least squares		Start reading Chapter 8 of textbook
	PS 8 and AE 8 assigned		
<i>Thursday, June 10</i>	Outliers, inference for linear regression	Lab 7	
	Lab 8: Intro to linear regression		
<i>Friday, June 11</i>	Buffer day (extra time for leftover stuff)	PS 7	
	-----	-----	-----
<i>Monday, June 14</i>	Intro to multiple regression, model selection	Lab 8	Start reading Chapter 9 of textbook
	PS 9 assigned		
<i>Tuesday, June 15</i>	Model selection (cont.), model diagnostics	PS 8	
	Lab 9: Multiple linear regression		
<i>Wednesday, June 16</i>	Logistic regression		
<i>Thursday, June 17</i>	Project presentation (1)	PS 9	
	Lab: Project report working time		
<i>Friday, June 18</i>	Project presentation (2)	Lab 9	
	-----	-----	-----
<i>Monday, June 21</i>	Final review	Project report	
<i>Tuesday, June 22</i>	Reading day: no class or lab!		
<i>Wednesday, June 23</i>	Final Exam day (mainly covers Ch. 6-9 but includes content in Ch. 1-5)		Exam open from 8am June 23 to 8am June 24
